
Aliança Underground Museum

ABOUT

The Aliança Underground Museum shelters an exhibition that is displayed along the traditional wine cellar of Aliança Vinhos de Portugal. Exhibiting seven distinct collections, this museum contemplates areas such as archeology, ethnography, mineralogy, paleontology, and ceramic tiles, covering millions of years of art history.

Integrated in the great universe of the Berardo Collection, these collections are the result of the constant care of the collector Jose Berardo in immunizing pieces and works of art, from multiple origins and artistic movements, with both historical and sentimental meanings.
