

Praia dos Pinheiros

ABOUT

Located in Lagos between Camilo Beach and the Ponta da Piedade, the Pinheiros Beach is small and shell shaped and limited to just 30 to 40 metres during high tide. Difficult to reach down steps carved into the surrounding rock slopes, which in turn provide shelter from the winds and create plays of shadows on the sand, ensures this is a peaceful Beach and a popular destination for naturists.

Among the many rock formations, one cave is especially worth visiting to discover how it opens out onto the adjoining cove.
