
Praia de Melides

ABOUT

Melides Beach is composed of the long stretch of sand that separates the sea and Melides Lagoon. Both access by road and the car parking are of good standard and this beach can be enjoyed with the back up of a full range of support infrastructures, including a volleyball net, for example.

The 4 kilometre road that leads to the beach, running past pine trees and rice paddies, also connects with Melides, a traditional Alentejo village with its white houses and calm streets, well worth a visit.
