## Praia dos Três Castelos

---

### ABOUT

Photo: Turismo do Algarve

The golden sand and calm blue sea best characterise the Três Castelos Beach located right by its more famous neighbour Praia da Rocha to which it is connected by a passageway carved through the rocks on its easterly limit.

To the west, the Beach borders the small Careanos Beach, with both backed by a tall cliff that is well worth walking in order to take in this landscape from a bird's eye perspective.
