
Praia da Costa de Santo André

ABOUT

Right by Santo André Lagoon, and part of a Nature Reserve, the Costa de Santo André Beach is a long stretch of sand with the Atlantic Ocean on one side and the calm waters of the lagoon on the other. Surrounded by golden dunes, this beach with its challenging waters is very popular among surfers.

Those preferring much calmer waters can turn to face the Lagoon with its excellent windsurfing and canoeing conditions. Alternatively, simply go for a walk and take in the beauty of the surrounding landscape and the various types of birds nesting here.
