
Termas das Caldas da Rainha

ABOUT

The foundation of this locality is deeply connected with Queen D. Leonor, the wife of King João II, who, in the 15th century, ordered the construction of equipments to help patients enjoying the benefits of those thermal waters.

Caldas da Rainha is one of the most important spas in Portugal which, throughout the times, have been demanded by the majority of portuguese Kings with the purpose of making their annual cure.
