
Jardim Antero de Quental

ABOUT

This garden pays homage to Antero de Quental (1841-1892), one of the leading figures in 19th-century Portuguese literature, who was born on the island of São Miguel. It contains a monument alluding to the life and work of this famous poet. The garden is decorated with features that are typical of the "art deco" style, particularly noticeable in the railings and the design of the pathways, which lend a special atmosphere to this leisure area.
