On the southern coast is the extensive, but sheltered bay of Sines, and perched above it lies the town with its mediaeval castle. The marina, situated close to the small Atlantic beach has 230 berths. Besides the usual facilities (reception, water and electricity supplies, public telephone and refuse disposal), the port of Sines has a permanent surveillance system, showers and washrooms, information about the weather, pump-out facilities for used oil disposal and the possibility of electronic payment through ATM system. There are several interesting monuments in the town's historical centre: the castle, whose keep houses a small Natural History Museum; the former governor's palace (Paço do Alcaide-Mor), where Vasco da Gama, the great Portuguese navigator who discovered the sea route to India, was born in the C15th; the parish church and the chapel of Nossa Senhora das Salvas, rebuilt at the orders of Vasco da Gama in the C16th. South of Sines there are beautiful golden sandy beaches stretching from São Torpes to the tiny island of Pessegueiro.

Blue Flag; Radio; Tide information; Guiding lights; Filling station; Water supply; Power supply available; Engine repairs; Hull repairs; Sail repairs; Travel lift available; Restaurant; Shops; Number of permanent mooring sites: 462; Maximum ship hull size at berthing point: 3 m; Maximum length at berthing point: 30 m; Frequency: VHF 09; Marina type: Ocean; Solid residue collection service; Bandeira Azul;

A winner of the The Yacht Harbour Association's 5 Gold Anchors, IMCI's 5 Blue Stars, "Euromarina Anchor Award" and the "European Blue Flag", Marina de Lagos opened in 1994. It is located among some of the world's best beaches and sailing grounds and has the privilege of being right in the heart of the home town of the Portuguese Discoveries. The approach to the marina is quite simple: take a 282^o course between the west harbour mole head and the tower of the Santo António church. Follow the channel leading to the waiting pontoon to starboard, immediately before the lifting bridge, where you must stop to check-in at reception. You have to request the opening of the bridge by VHF on channel 09 - "Marina de Lagos". The bridge operates from 08.00 to 22.00 in the summer and from 09.00 to 18.00/19.00 in the winter. The marina has 462 berths and is equipped with 24-hour surveillance and medical care facilities. Besides the basic infrastructures there are separate disposal units for ordinary and recyclable waste on land, as well as emergency telephones connected to the reception and security services. At the entrance to each pontoon (access is by magnetic key) trolleys are available for the use of berth holders. During the high season, a weather report is broadcast twice daily in both Portuguese and English, and shown on screen at the reception, where there is also a notice board with a list of people specializing in different types of repairs. Next to the marina is a boat repair yard, with a 36-ton travel lift. You will also find a number of businesses in the marina's commercial building (restaurants, magazines and newspapers, perfumes, tobacconist, etc.), as well as laundry and washroom facilities. Immediately behind this building, berth holders are have another travel choice: the railway station - the former historical construction decorated with green and white azulejo tiles is no longer in use, but the new one station has trains taking the visitor further afield, whilst the Meia Praia beach is not far away (about 400 metres to the South). On the other side of the marina, after a short walk past the lifting bridge and bus terminal, the visitor finds himself in the historical centre of Lagos. truction decorated with green and white azulejos) has trains taking the visitor further afield, whilst a sandy footpath leads to the beach of Meia Praia (300 metres away). On the other side of the marina, after walking past the lift bridge and bus terminal, the visitor finds himself in the historical centre of Lagos.

Blue Flag; Radio; Tide information; Guiding lights; Filling station; Water supply; Power supply available; Sea ramp available; Engine repairs; Hull repairs; Sail repairs; Tidal grid services; Travel lift available; Restaurant; Shops; Number of permanent mooring sites: 825; Maximum ship hull size at berthing point: 4 m; Maximum length at berthing point: 60 m; Frequency: VHF 09, 16, 62; Marina type: Ocean; Lifting gear available; Solid residue collection service; Boats for hire; Bandeira Azul;

With its 1300 berths, the Marina at Vilamoura is the largest in the country. After passing through the entrance at the bar (which has never been closed), there is a safe anchorage protected by two jetties (the western one is 660 metres long and the eastern one 430 metres long). This provides access to the inner harbour via a small channel where the reception quay and fuel supply station are to be found. The harbour is divided into two separate areas for boats with different draughts and is navigable by boats with draughts of up to 4 metres and up to 50 metres in length. However, as a precaution, boats that are more than 35 metres long and have draughts of more than 3 metres should contact the marina services by radio (VHF, channels 9 and 16) before entering, in order to obtain the latest information on the marina's depth. The marina has an extremely wide range of facilities for pleasure craft, including repair services (boatyard, electrical repairs, repairs to engines and sails) and has a 30-ton portal crane, 3-ton travelling crane and 1-ton electric crane, ramp and tidal grid. There are all kinds of shops around the marina (including a chemist's and banks), as well as restaurants, hotels and a yacht club, all of which help to make the visitor's stay even more pleasant. Situated in the heart of the Algarve coast, the Vilamoura Marina is surrounded by magnificent beaches and prestigious tourist developments, with several golf courses close at hand.

Blue Flag Only a 10-minute car ride from the marina, sailors also have access to a golf course and Lajes International airport is only five minutes away. The marina is very close to the city centre, with good access to shops and facilities. The marina has rent-a-car services, taxis and buses. Visitors may also use the bathing area, launderette, controlled by a magnetic card, 24-hour surveillance, a petrol station, open-air parking, hotel, apart-hotel, restaurants and bars.; Tide information; Guiding lights; Water supply; Power supply available; Sea ramp available; Engine repairs; Hull repairs; Sail repairs; Travel lift available; Restaurant; Shops; Number of permanent mooring sites: 210; Maximum ship hull size at berthing point: 2,5 m; Maximum length at berthing point: 6 m; Frequency: VHF 9, 16; Marina type: Ocean; Bandeira Azul;

The Praia da Vitória Marina is located on the far eastern corner of Terceira Island, in the Archipelago of the Azores, at the coordinates 38° 43"N, 27° 03"W. The marina is protected by the Northern and Southern jetties of the bay in the city of Praia da Vitória. After passing the jetties, visitors will view the sandy beaches of Prainha and Praia Grande and the seafront road, Avenida Beira-Mar. The area is constituted by the largest sandy beach in the Azores and its natural harbour enables nautical sports to be practised, such as sailing, windsurfing, water ski, water bike, boat trips, sea fishing, underwater diving and whale watching.

Situated on the northern bank of the Mondego River, 0.8 nautical miles from its mouth, is the Marina of Figueira da Foz. This consists of a harbour with a total area of 5 hectares, comprising several piers and floating fingers, and with 200 berths for boats between 6 and 15 metres in length. It also has a 120-metre-long quay, at which larger craft can moor. The marina offers visitors a wide range of facilities, including hull and engine repair services. Its geographical location, however, helps to make it not only a place where the crew can rest or where yachtsmen can stop to repair their boats and replenish supplies, but also an extremely pleasant spot for a holiday, in view of the wide variety of leisure options on offer. Besides the long sandy beaches to the north and south of the marina, its close proximity to the city centre provides easy access to a number of sights of great architectural and cultural interest.

Situated between two beautiful stretches of golden sand, Nazaré is the most sheltered harbour to the north of Lisbon, without its bar ever having silted up. It has berths for 52 boats up to 25 metres in length and with draughts of less than 4 metres. In addition to the usual facilities, another useful service is the information provided to tourists about this fishing port, where the local inhabitants wear typically picturesque regional costumes. No visitor can leave the area without taking a trip up to O Sítio, a panoramic promontory overlooking the town, where is worth visiting the old parish church, dating from the C14th but rebuilt in the C17th.

Peniche

Marina da Ribeira - Peniche

Marinas and Harbours

Address: Largo da Ribeira Velha 2520 Peniche

Situated inside the western jetty of the port of Peniche, the Marina da Ribeira has 140 berths for boats up to 15 metres in length and with draughts of less than 4 metres, 20 of which are reserved for transient moorages. Besides the usual facilities (pump-out facilities, washrooms, laundry service, fuel), it has both a ramp and a crane. Because of its location on the Peniche

peninsula, this marina not only provides shelter for those travelling between Europe and the Mediterranean, but is also situated in an area of great interest for tourists. A welcoming, nautical atmosphere can be felt in the various restaurants near the port, where the cuisine naturally reflects the influence of the sea. Between 6 and 10 miles from the coast, directly opposite the peninsula, are the Berlengas, a nature reserve composed of islands, islets and rocks, with their own specific flora and fauna. This haven of emerald and turquoise waters can be visited by anchoring off on the south eastern side of the largest island, Berlenga Grande, the only place that has safe anchorages, marked by a lighthouse.

Radio; Tide information; Filling station; Water supply; Power supply available; Sea ramp available; Engine repairs; Hull repairs; Travel lift available; Restaurant; Shops; Number of permanent mooring sites: 194; Maximum ship hull size at berthing point: -2(ZH); Maximum length at berthing point: 12; Frequency: VHF 12, 74; Marina type: River; Lifting gear available; Solid residue collection service;

With 194 berths for boats up to 12 metres in length and several facilities for the dry-dock repair and maintenance of boats (portal crane, tidal grid, electro-hydraulic boat hoist), the Doca de Belém represents an important symbolic location for all the world's yachtsmen: it was from here that the Portuguese ships set sail in the C15th and C16th on their voyages of discovery and so completely revolutionized the world of sailing and navigation. This marina is therefore surrounded by an impressive cluster of commemorative monuments, including the Mosteiro dos Jerónimos, a masterpiece of C16th Portuguese architecture and has been classified by UNESCO as world heritage.

Radio; Tide information; Water supply; Power supply available; Sea ramp available; Restaurant; Shops; Number of permanent mooring sites: 321; Maximum ship hull size at berthing point: -2 (ZH); Maximum length at berthing point: 12; Frequency: VHF 12, 74; Marina type: River; Solid residue collection service; Bandeira Azul;

The dock at Santo Amaro, situated immediately to the east of Ponte 25 de Abril, has moorages for 321 boats up to 12 metres in length. It is a fine example of the ingenious conversion of old port facilities into a lively marina. Overlooked by a pontoon full of brightly-coloured pavement cafés, this marina is surrounded by a surprisingly large number of restaurants, bars and discotheques. Together with the Alcântara dock, this is the ideal berth for anyone who wants to share in the fun and excitement of the "beautiful people".

Marina do Parque das Nações

This dock formerly belonged to the Portuguese Navy and has been opened to pleasure craft (with 163 berths for boats up to 15 metres in length). It is situated a short distance to the east of the Torre de Belém, a 16th C monument classified by UNESCO as world heritage and a magnificent example of the Manueline style of architecture (an elaborate and exclusively Portuguese variety of the late Gothic style). Between this tower, which has since become the very hallmark of Lisboa, and the Praça do Império, there are several important monuments facing the river and marking the point from which the Portuguese navigators set sail on their great voyages of discovery (beginning in 1415).

Quinta do Lorde Marina, is located at Ponta de São Lourenço Peninsula, the most south-eastern tip of Madeira Island. It is the first stop for sailors arriving to Madeira Island from the East and Portugal mainland. This sheltered marina, built below the extinct Piedade Volcano, is a good place for a brief stopover while discovering the Madeira beauties or even for the winter time lay-up in the Atlantic. Quinta do Lorde Marina is part of the dazzling Quinta do Lorde Resort and offers modern facilities and an experienced team. The new boatyard "Repmaritima" is located about 10 miles W from Quinta do Lorde Marina, just beneath the Madeira International Airport runway. This unique covered boatyard allows the winter layup without taking out the mast. The boatyard is also fully equipped to provide painting services and a liferaft inspection & maintenance centre.

Porto de Recreio da Calheta

Radio; Tide information; Guiding lights; Filling station; Water supply; Power supply available; Sea ramp available; Restaurant; Shops; Number of permanent mooring sites: 300; Maximum ship hull size at berthing point: 3 - 4,5 mts.; Maximum length at berthing point: 25 mts.; Frequency: VHF 16; Canal privado 36; Marina type: Ocean; Lifting gear available; Solid residue collection service;

Sunny Calheta, already an excellent place for pleasure boating and water sports, is now even more attractive. The marina has helped to make the most of Calheta's potential, converting its coast into a charming leisure area. It is located about 14 miles west of Funchal and has berths for some 300 yachts from six to 20 metres. It is the second largest marina in Madeira. The marina also boasts a refuelling and wastewater disposal dock, a ramp for hoisting small boats, 400 paid parking places and nautical facilities that include the Calheta Yacht Club. It is surrounded by about two hectares of spectacular green areas and some retail outlets have moved in to make the complex even more attractive.

Marina do Lugar de Baixo

Radio; Tide information; Guiding lights; Water supply; Power supply available; Sea ramp available; Restaurant; Shops; Number of permanent mooring sites: 297; Maximum ship hull size at berthing point: 5 mts.; Maximum length at berthing point: 20 mts.; Frequency: VHF 16; Canal privado: 36; Marina type: Ocean; Solid residue collection service;

This marina was built to encourage the development of water sports and has moorings for 297 ships from eight to 25 metres. Located in the municipality of Ponta do Sol, on Madeira's west coast, the marina also has a waiting dock, a ramp for beaching small boats, shops, restaurants, nautical facilities, a playing field, a gym and swimming pools. If you're going to be in the area, take the opportunity to explore Lagoa do Lugar de Baixo. This is a lagoon near the marina, with a leisure pavilion and an ecotourism pavilion, using the lagoon's natural habitat and Madeira's unique fauna and flora.

Ilha de Porto Santo

Marina de Porto Santo

Marinas and Harbours

The Porto Atlântico Marina, situated at Leça da Palmeira in the borough of Matosinhos, serves Portugal's second largest city, Porto, which is a pleasant 10-kilometre tram ride away along the seafront and river bank. It has 240 berths for yachts up to 30

metres in length, although longer vessels may also moor there. In addition to its many facilities (including a 6.5 ton crane and a tidal grid for larger craft), the marina has 4 yacht clubs, a clear sign of its sporting vocation, where visitors can meet up with other keen devotees of the life on the ocean waves. In this surrounding area, there is also a mechanical maintenance service, sail repair service, carpenters and electricians, as well as a supermarket, banks, post offices and several shops (including one selling nautical articles). In the immediate vicinity of the marina are the beaches of Leça, the Quinta da Conceição (tennis courts and a swimming-pool), the tidal swimming-pool and the Museum and Stately Home of Quinta de Santiago, without forgetting the historical centres of Matosinhos and Leça da Palmeira, both of which are full of restaurants where visitors can enjoy the traditional local fish and seafood dishes. Also close by are several prestigious golf courses.

Telephone: +351 258 359 546/2 **Fax:** +351 258 359 549

E-mail: marina@apvc.pt **Website:** <http://www.apvc.pt>

Radio; Tide information; Guiding lights; Water supply; Power supply available; Sea ramp available; Tidal grid services; Travel lift available; Restaurant; Shops; Number of permanent mooring sites: 307; Maximum ship hull size at berthing point: 3 m; Maximum length at berthing point: 20 m; Frequency: VHF 9, 16; Marina type: River;

Situated in the north of the country, Viana Marina is the first harbour encountered on the Portuguese coast by yachtsmen arriving from the North of Europe (30 miles from both Vigo and Leixões). It affords excellent conditions of shelter in all weathers and is equipped with all the necessary facilities. The entrance channel at the bar of the harbour is marked with 14 buoys in keeping with the IALA (zone A) system, and provides access to the main dock, with 163 berths for boats up to 20 metres in length and with draughts of up to 3 metres. There is also another dock with 144 berths for boats no more than 6 metres in length and with draughts of up to 2 metres. Since the marina is close to the centre of Viana, visitors are perfectly situated to enjoy the city's rich historical heritage.

Vila Nova de Gaia

Douro Marina

Marinas and Harbours

Address: Rua da Praia, s/n4400 - 554 Vila Nova de Gaia

E-mail: info@douromarina.com **Website:** <http://www.douromarina.com>

The Douro Marina took advantage of the ideal conditions for water sports offered by the Douro River and designed an infrastructure capable of enhancing the practice of various nautical activities. The marina's Nautical Centre offers a range of water sports activities, developed for both professional public and enthusiasts of amusement, as well as for those who are looking for to spend a good time with the family. This new venture is a milestone in Northern Portugal and enjoys all the qualities of this Region, offering a range of services that will make of Douro marina a stopover.; Radio; Tide information; Guiding lights; Filling station; Water supply; Power supply available; Sea ramp available; Engine repairs; Hull repairs; Sail repairs; Travel lift available; Restaurant; Shops; Number of permanent mooring sites: 300; Maximum ship hull size at berthing point: 3,5; Maximum length at berthing point: 55; Frequency: 9; Marina type: River; Lifting gear available; Solid residue collection service; Boats for hire;

Located in the Northwest of the Iberian Peninsula and stimulator of an innovative concept that reflects the importance of sport, leisure, welfare and deep respect for nature, the Douro Marina is much more than a recreational Harbour. Vila Nova de Gaia and Oporto are drawn from the Douro River, which is also a Heritage of Humanity, gain contours that characterize the history and tradition of these cities, linked by the river, are some of the oldest in Europe. The Douro Marina is the nautical gateway to the touristic Douro and to the Northern Region of Portugal. Within a walking distance of the famous Ribeira de Gaia and the mythical historical center of Porto, the dock, which ensures all

international requirements for safety and comfort, has the capacity to receive and accommodate 300 boats. The marina, offers exclusive services, also relies on a group of specialized professionals whose mission is to ensure the comfort and the well-being of the visitors. Douro Marina is located just 15km far from the International Airport Francisco Sá Carneiro
